DESCRIPTION

The G50 pool cleaner represents a new generation of robots for public swimming pools. Specifically designed for commercial and school pools up to 50m in length. The G50 robot contains all the G25 model features only on a larger scale, decreasing to half time cleaning your pool. All you have to do is place the robot in the pool and turn it on. Includes 40m floating cable and aluminum transport trolley.

FUNCTION

The G50 Pool Cleaner effectively cleans the bottom and walls automatically. You can also carry out cleaning manually, with the help of the wireless controller.

Effective cleaning of the bottom and pool walls. For pools up to 50mt.
