Olympic Floating Lanes

Exclusive Golfinho Sports® Design

Olympic

Olympic PRO

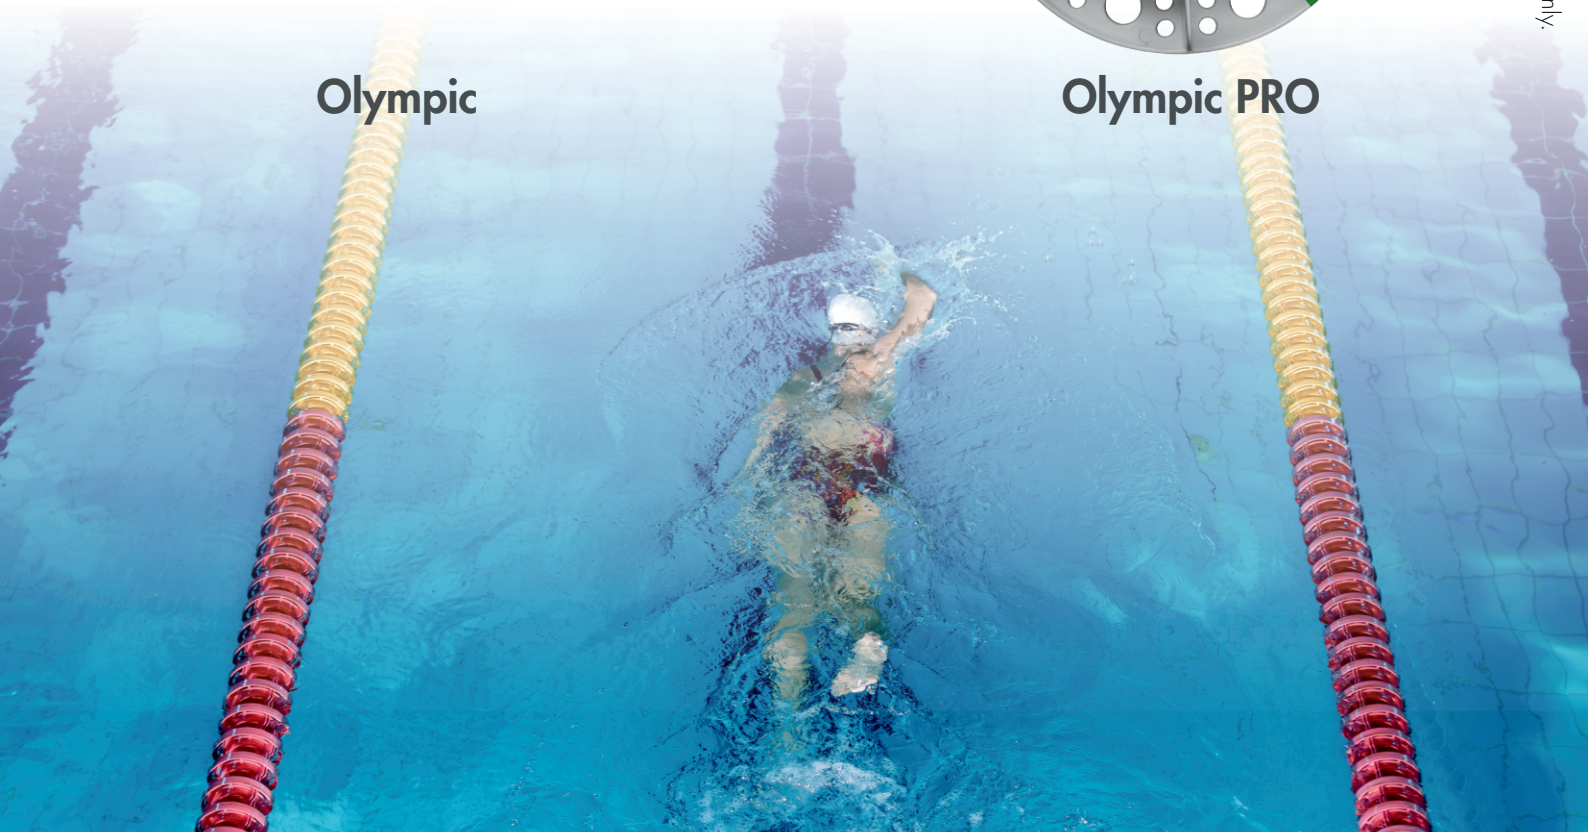

Image for illustrative purposes only.

The Olympic 100mm and Olympic PRO 150mm floating lanes are made up of a new wave cutter technology with an exclusive Golfinho Sports® design, the main aim of which is to increase the wave blocking between lanes in the pool. The various microdonuts placed at specific points along the separator guarantee its buoyancy.

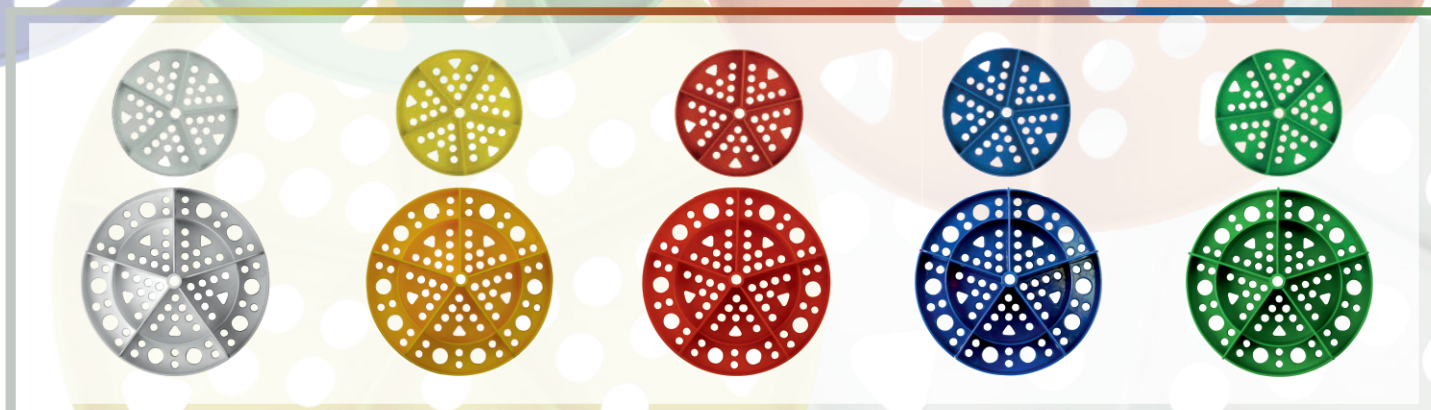

Made from softer, more flexible high-density polyethylene with superior resistance to UV rays, the new lane dividers are ideal for competition pools. They also comply with World Aquatics and European safety standards.

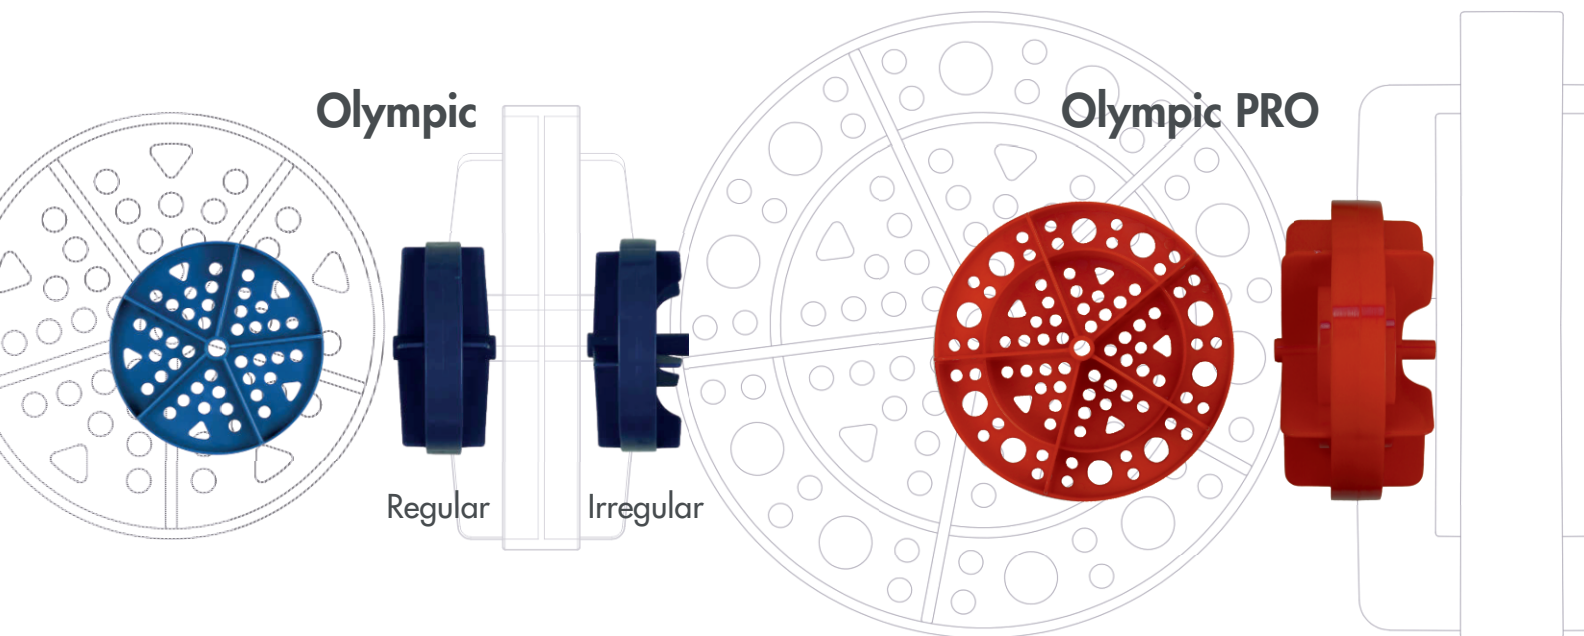

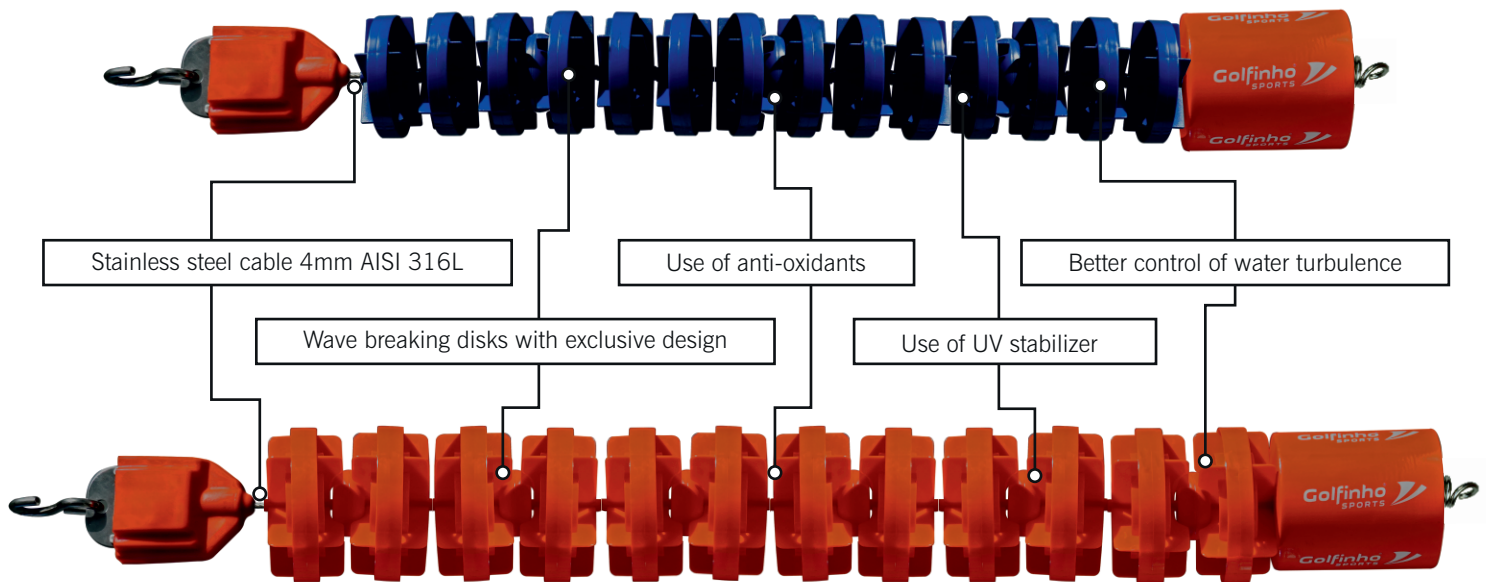

Characteristics

	Olympic	Olympic PRO
Ideal for 25-meter swimming pools	✓	✓
Ideal for 50-meter swimming pools	✗	✓
