

ECOPOOL

Portable Pool Lift

Ref. E5250

ECOPOOL is an electrically operated portable pool lift that makes it easier for people with reduced mobility to get into the water. With a load capacity of 150 kg, it guarantees good performance in terms of reliability and safety for users, at a relatively low cost.

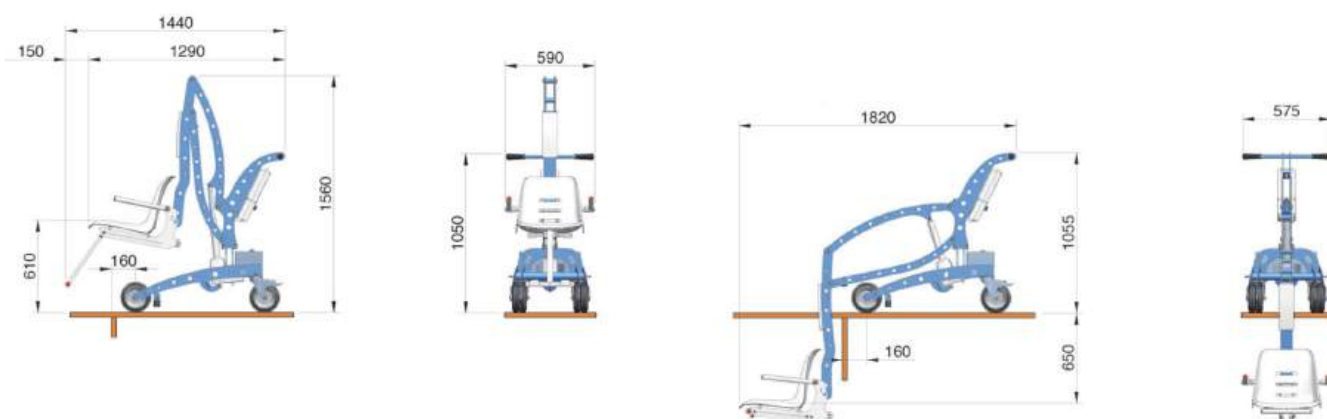

It is equipped with a rubber safety brake at the front and a service brake on the rear wheels. As well as a headrest, the armrests are adjustable and the leg rest is removable for more comfortable immersion in the water. Although it comes with a 2-point seat belt, it can be fitted with a 4- or 5-point belt, depending on the user's needs.

Features

Lifting capacity	150 Kg
Time of lowering	20 s
Time of lifting	25 s
Depth of seat	650 mm
Autonomy cycles	60 cycles
Weight	135 Kg
Battery	12 V
Power	24 V
