

Rescue Flexible Belt

Ref. MS031

Designed to save lives.

Professional rescue can be developed for **water rescue operations**, ensuring **high buoyancy, durability**, and **safety** during victim approach and stabilization. Designed for intensive use by lifeguards in beach, pool, or inland water environments.

It offers **strong resistance to wear and demanding marine conditions**, ensuring durability even under intensive use. Its excellent buoyancy provides **effective support to the victim during rescue**, contributing to their stability in the water.

Additionally, it is **easy to maintain and clean**, which facilitates **long-term preservation**. It is therefore a reliable and suitable solution for demanding professional environments.

Features:

- Closed-cell **NBR foam** construction, fully waterproof;
- High-resistance **vinyl outer coating**, resistant to tears and punctures;
- Multilayer structure that **enhances equipment durability**;
- Hydrodynamic shape that **reduces drag** in the water;
- Rounded ends for increased wear resistance;
- Integrated belt system along the entire body, ensuring secure fastening to the victim;

Information:

Material - High-resistance vinyl

Length - 105 cm

Width - 15 cm

Height - 8 cm

Weight - 1,1 kg
