

Competition Starting Block

*Developed in accordance with
WORLD AQUATICS regulations*

Ref. E5204

Designed for competition, in compliance with World Aquatics regulations.

The Competition Starting Block is the ideal solution for swimming venues looking to elevate the **quality** of their competitions.

Our Starting Block is built with superior quality and designed down to the smallest detail. More than just an aesthetic or structural element, it is a **key component** in the performance, safety, and credibility of any venue and competition.

Features:

- Platform with **non-slip surface**, adjustable in **5 positions**;
- **Integrated opening system** for the installation of an electronic timing speaker;
- **Adjustable backstroke start support**, allowing swimmers to assume an optimal starting position and optimize reaction time;
- **Numbering on all four sides**;
- **Concealed fixing system** for a cleaner, more professional finish;
- High **corrosion resistance and durability** in pool environments.

Informations:

Body:

Material - Electropolished AISI-316L Stainless Steel

Length - 30 cm

Width - 25 cm

Height - 40 cm

Platform:

Material - Fiberglass

Length - 74 cm

Width - 52 cm

Height - 17 cm

Total Weight: 46 kg

Mounting hardware **not included**

Product delivered **fully assembled**

Relay Break Detection System

Ref. E5204.RBD - Competition Starting Block with Relay Break Start Detection System

Electronic mechanism that, when activated by the pressure of the athlete's movement, registers the start, accurately identifying reaction times and false starts, with connection to the electronic timing system.

The False Start Detection System is available as an **option** when purchasing the Competition Starting Block.
